Automate Your Workflows

Easy to use Interface

PrintDOCTOR® LFP can:

- Preflight Information**
Details and descriptions about your file[s] can be viewed on each individual file including multi-page PDF files.
- Ink and Media Costing**
Allows users to easily retrieve costing information of the ink and media used, which is valuable to estimating profitability of print. A reporting system has also been added as a save function.
- Workflow Management**
Enables users to easily add parameters to existing printer hot folders by which to automatically control where a files are sent. This screen also gives a visual showing all files sent to print and how much time is left for printing.

Mobile...Productive...Accurate

The main interface is user friendly and arranged into easy to understand areas. Any issues that may affect the output quality along with suggestions for a remedy of the situation are listed. The production Station can maintain a variety of workflows to multiple RIP and/or printer stations and distributes print files for simultaneous printing.

Works with Any RIP and Printer Combination!
